India ink, Graphite, Charcoal & Carbon

Advanced Encaustic Monotype Workshop

Advance Monotype Workshop: Intuition and Intention

Description:

This workshop offers artists the opportunity to explore and discover new shapes and ideas while doing several directed exercises using graphite, black India ink, charcoal and carbon. This mark making expressions (gestural marks) help and direct the artist to focus on deeper and thought-provoking aspects of process-oriented abstraction using patterns and emotions as a source of inspiration. These exercises allow the work to unfold by balancing intuition with intention, and finding one's personal direction while using a variety of simple tools and found objects.

We will also provide encaustic metallic color sticks and discuss several approaches and painting techniques during the subtractive and additive process application.

Skills Needed:

Open to artists at all levels, but basic monotype printing and painting knowledge needed. If you do not have these, or need a refresher, please ask Jorge about private or semi-private workshops a few days prior, to help you get ready.
